MMS Country Research Project

Montgomery Middle School sixth grade students in Dr. Meeker’s class presented research projects on a country of their own choosing. They had to create an attractive cover as well has create a flag and map of the country. They also had to present their research on the country's geography and climate, history, culture, and economy. Finally, they had to research what a day in the life of a 12 year old from that country would be like.
