Montgomery Moving Forward 2020

FAQs

### Instructional

**Q: Will a daily schedule be provided?**

- Your child’s teacher will provide a suggested schedule and list of instructional activities to be completed.

**Q: How much flexibility do we have with the suggested schedule? Do I have to take off work to assist my child during school hours?**

- We are very flexible in working with you throughout the day. As long as your child is engaged a total of 4 hours each day and completes the necessary assignments, the schedule is flexible. As long as assignments are turned in through SeeSaw by 11:59 p.m. the day they are due, they are considered on time.

  ➢ **Teacher Assignments**

**Q: Will the remote teacher for the 1st 3 weeks be the same teacher when we return face to face?**

- Our goal is always consistency, however until we know how many students will continue to receive remote instruction following return to campus, we cannot be certain how many teachers may be needed to provide remote instruction. For this reason, completion of the survey for choice of instruction when we have the option to return to school is critical.

**Q: If my child switches to remote instruction due to exposure or illness, will they have the same teacher?**

- Should your student need to switch to remote learning due to exposure or illness, while the remote teacher will provide the instruction, they will still have frequent contact with their assigned teacher.

  ➢ **SeeSaw Compatibility**

**Q: Is an Apple iPad compatible with SeeSaw?**

- SeeSaw is compatible on iPads and laptop computers.

### School Supplies & Learning Materials

**Q: If we preordered school supplies, when do we get them?**

- School supplies will be held at the campus until we return to traditional, in person learning. Please contact your campus should you have a special circumstance and need to pick up earlier.

**Q: For remote learning will there be workbooks/worksheets provided or all electronic work?**

- Beginning September 8, should you elect remote learning for your child, arrangements may be made for your child to receive any related consumable curriculum applicable to what they are learning.
➢ Tuition Based Pre-K

Q: We registered for Tuition Based Pre-K. Will there be a discount for the remote learning period?

• Yes, you will be charge tuition. A certified PreK teacher will offer remote learning for your child.

➢ Special Populations

Q: My child receives support through Special Education, what will this look like during remote learning?

• Students with the most significant needs, accessing an alternate curriculum and receiving multiple services will be invited to campus to receive these services face to face. School personnel will be reaching out to families regarding arranging this service schedule for these students. Students who access the general education curriculum with accommodations and instructional support will receive services virtually with their special education teacher.

Q: My child receives services for Dyslexia, what is the plan for this?

• Dyslexia intervention will be offered. Campus Dyslexia Interventionist will be in touch with families regarding delivery of these services.

Q: My child receives Intervention through RTI, will they receive this during virtual learning?

• Intervention will be offered. The Campus Interventionist will be in touch with families regarding delivery of these services.

Q: Will my child receive GT services during Remote Learning?

• Students who receive GT services will work with a GT trained teacher on their TPSP (Texas Performance Standards Project) during remote learning time.

Operations and Safety

➢ Mask Requirements

Q: Regarding masks, will the mask rule for ages 10 and up be enforced?

• Yes, we are following the Governor’s order copied below:

• Students age 10 and up that do not come to school with a mask will be offered one. Parents will be contacted and these students will be offered remote instruction.

Q. What about students age 9 and under?

• Students age 9 and under are strongly encouraged to wear a mask as a precaution. Should there be a confirmed case and exposure, the protection of a mask would ensure that your child has not been in close contact as defined in our local and state protocols.

• Based on our local and state protocols, a child that has been in close contact with a confirmed positive case may not require quarantine.
